

Thalluru Lakshmi Sai Kalyan

Data Engineer

✉ tlskalyan1996@gmail.com | ☎ 9494085752 | 📍 India |  Kalyan Thalluru

Summary

Having 5+ years of total professional experience, of which nearly 3.5 years of working experience in Hadoop Ecosystem, design/developing applications Using SPARK, HIVE and SQL

Work Experience

I.T. Analyst Oct 2024 - Present

Tata Consultancy Services-Bank Of America

- Having experience on end to end agile project methodology performing Impact analysis , mapping. Design creation & code deployment.
- Experience in Design, Develop and maintain scalable and efficient data pipelines and Data ingestion processes
- Have good experience on implementing data transformations, aggregations on business logics
- Experience in Spark, Hive & Shell Script , Decreased the run time of the jobs by performing performance tuning in the Py-spark scripts
- Responsible for ongoing Support which includes solving the production issues on a priority basis and involved in opening and fixing the defects when required.
- Understanding of Data Engineering tools/frameworks and standards to improve the productivity and quality of output for Data Engineers across the team.
- Involved in end-to-end application migration projects.
- Have strong expertise in monitoring & trouble shooting data pipelines to ensure seamless data flow.
- Good knowledge on understanding requirements & communication with client

Programming Analyst Nov 2020 - Jul 2023

Cognizant-H.E.B Projects

- Receiving data from HDFS loading into Spark Environment and created Data frames to analyses the data through multiple staging area.
- Creating code to read the data Seamlessly from the HDFS and to a create a Data frame Using Scala Programming language .
- Flattening the JSON data Applying Necessary Spark APIs to create Data frame.
- Re-Creating the Complex json and XML Back as per the Business requirement for the downstream users.
- Having Different Stages of Steps for Data transformation in Spark.
- Wrote high-level estimate and design documents for new software functionality.
- Experience in using Text, Parquet, ORC, Sequence files, AVRO and JSON file formats.
- Responsible for ongoing Support which includes solving the production issues on a priority basis and involved in opening and fixing the defects when required.
- Performing actions which include cleansing and transformation.

- Worked along with the test team for any issues during testing and provided data for testing.
- Experience in Analyzing the data and saving the output data sets on Amazon S3.
- Responsible for implementing new requirements as per customer's request.
- Worked along with the test team for any issues during testing and provided data for testing.
- Experience in Analyzing the data and saving the output data sets on Amazon S3.
- Responsible for implementing new requirements as per customer's request.
- Code & peer review of assigned task. Unit testing and Bug fixing
- Prepare and submit reports on Daily and Weekly basis to the customer about the project related activities
- Participated in daily Scrum meetings to discuss progress on projects and tasks assigned

Programing Analyst Trainee

Dec 2018 - Nov 2020

Cogniant-METLIFE Projects

- Involved in creating HDFS directories to store the data and Hive table.
- Worked on table with dental insurance coverage related Tables
- Performing actions which include cleansing and transformation of data.
- Pushing the crunched data to Hive table
- Loaded and transformed large sets of semi structured data like XML, JSON, Avro, Parquet.
- Loading and writing data from AWS S3 using Spark
- Code & peer review of assigned task. Unit testing and Bug fixing

Education

Bachelor of Engineering
R.M.D Engineering College

Aug 2014 - Jun 2018

Skills

Primary Skill

- Apache Spark
- Sqoop
- SQL
- AutoSys-Job Scheduler
- Apache Hive
- HDFS
- Scala Spark& Py-Spark

Secondary Skill

- Python
- Shell Scripting

Defect Tools

- Jira

Approach

- WaterFall
- Agile
- SDLC
